

IELTS Speaking - Useful IELTS Interview Expressions

Useful IELTS Interview Expressions

Lesson 10

In this lesson we will look at some **useful IELTS interview expressions**.

You need to make sure that you have adequate vocabulary and phrases to explain your position in the speaking test.

You may need to ask for **clarification** if you don't understand something, or for something to be **repeated** if it was said too fast for you.

[restrict paid=true]

It is also good if you have a variety of phrases to **give your opinion**. It is common in part three of the IELTS test, for example, to be given an opinion or view and to say what you think about it.

So you will need to say if you **agree** or **disagree**, or **partially agree**. Or maybe you think it **depends on the circumstances**.

Or you may need to give yourself some **thinking time** before you can answer a question.

Knowing and practicing some useful phrases will help you in this respect.

Interview Phrases

Below are a **list of phrases to help improve your IELTS speaking** and under the table is some further explanation for some of the phrases.

Most of these phrases and the examples below are more relevant to part 3 of the speaking test because this is where you are asked your opinion more than part 1, and you are more likely to misunderstand a question or need further clarification because the questions are more difficult.
