Outline

Essay Type

Advantages Disadvantages Essay

Introduction

- Introduce the given topic and reflect on what does the statement entail.
- Clearly state the preferred side (Disadvantage)

Body

- Paragraph 1: State the advantages of technology. (Children tend to enjoy playing computer games, and such games might help improve their cognitive development.)
- Paragraph 2: State the disadvantage of technology. (One main drawback is that children who enjoy spending time in front of the computer screen are often reluctant to do exercise.)

Conclusion

Clearly conclude with the supported notion.

Sample Essay

Currently, it is true that the way children spend their leisure time has been changed by new technology. While this has several benefits, I believe that the drawbacks far outweigh them.

On the one hand, there are some advantages to children spending their spare time on advanced technologies. Firstly, many children tend to enjoy playing computer games, and such games might help improve their cognitive development. For example, strategic games require players to be good at problem-solving and be able to deal with unexpected situations, so children who play these games can better their logical thinking and problem-solving skills. Secondly, since the source of online information is huge and readily available, young people might benefit from early exposure to the Internet. If people are able to browse the Internet at a young age, they can start their learning process earlier, and as a result, can advance their knowledge as they grow up.

However, I would argue that the advantages discussed above are outweighed by the disadvantages. One main drawback is that children who enjoy spending time in front of the computer screen are often reluctant to do exercise. Low physical activity levels are likely to result in children becoming overweight, and in turn, they would end up being obese. In addition, some games tempt people to continue playing for hours, which could lead to gaming addiction. In role-playing games, for instance, people might need to stay in front of the computer for several hours in order to progress to higher levels, and therefore children may spend an excessive amount of time on games.

In conclusion, while there are some advantages to children spending time on advanced technologies, it seems to me that the disadvantages are more significant.

Technology has been triumphant over sundry verticals nowadays which has modified the leisure time spent by the children around. Although that comes along with the pace digitization has been moving ahead with

Technology has been triumphant over sundry verticals nowadays which has modified the leisure time spent by the children around. Although that comes along with the pace digitization has been moving ahead with and could prove advantageous in the same regard, however, it has its major share of drawbacks that supersedes its advantages in the long marathon. In the forthcoming paragraphs, this essay will analyze both sides.

There are a few pros to children putting their hours of free time in learning the advancement of the technologies and the modus operandi of the same as that keeps them moving and aligning with the dynamic world, especially, during current times. It enhances their digital knowledge that somehow has become the need of the hour in every walks of life. Not only does it improvise their techno acumen, but also keeps them engrossed and absorbed and hence magnifies their wizardry in this domain. For instance, learning coding, programming, and web development aggrandizes their discernment and thereby, prepares them for employment opportunities.

Nevertheless, there are a plethora of significant downsides to that, as well. The exposure and access children get at such a tender age to the avenues of the digital world has often

proven to be potentially hazardous to the personalities and thought processes of children using them more. It has been surveyed that teenagers are more prone and vulnerable to be fallen into the trap of cybercrimes and phishing. Moreover, vehement content and certain sites are doing more harm than good. Health demerits again are found very predominantly amongst the segment of children indulged heavily in the usage of computers, be it, obesity, dry eyes symptoms, stress, migraine, etc. Graphic violence again is one of the most pronounced dynamics when it comes to the adverse foreground. Certain games like “Bluewhale” were proscribed after multiple cases were registered against its effects on the younger generation that was reportedly committing suicide post reaching the final stage of the game.

All in all, it could be concluded that although technical expansion is a requirement right now, the pitfalls of children spending their free time on the same often overtakes its advantages and is riskier in the long run.

Bonus questions:

- Computers are being used in almost all sectors and we are becoming more dependent on this machine. What are the possible future usages of computers and what are the benefits and drawbacks of the extensive usages of computers in our life?
- We are becoming increasingly dependent on computers. They are used in business, crime detection and even to fly planes. What things will they be used for in future? Is this dependence on computers a good thing or should we be more suspicious of their benefits?
- Modern technology now allows rapid and uncontrolled access and exchange of information. Far from being beneficial, this is a danger to our society. What is your view?
- Earlier technological developments brought more benefits and changed the lives of ordinary people more than recent developments ever will. To what extent do you agree or disagree?
- The presence of technology in the classroom has become more and more apparent and offers students tremendous resources with which to supplement their education. Given time, technology will completely replace the traditional teacher in the classroom.
- The internet has brought about many changes into our day to day life. Nowadays we are doing things such as mailing, contacting, banking and communication much faster. Do these developments have more advantages than disadvantages?
